

## *Some Suggestions for our Grooms*

- Try on the Tux...no, really try it on. Make sure before you and or your groomsmen leave the tux shop that each of you completely try on your tux. This will prevent one of the biggest problems that happens almost every wedding.
- Don't forget your black socks! If you don't own them, you can get them at the tux shop too. Maybe pick up an extra pair just in case.
- Wear sun block the day before and the day of the wedding! Nothing worse than having the guys show up looking like lobsters.
- Consider having separate ushers from your groomsmen. You and your groomsmen may be busy with pictures before the ceremony, your ushers will be free to arrive to the church early and be ready to greet your first guests.
- Get to know the time line for the wedding day. It will help keep you and you guys stay on time if you are aware of the timing and order of events. Example, you can't have the limo make an extra stop ( beer run) on the way to the church... if the same car is scheduled to go back and get the girls and have them back to the church before the ceremony begins.
- Think about sending something special to your bride the morning of the big day, a hand written note or a bouquet of her favorite flowers.
- Don't forget your mom, a nice note to your mom or parents will make their day, too.
- Have something arranged special for the bridal suite. Any room can be made special with just a few extra touches, a card addressed to "my wife" or her favorite candies left on the pillow....a perfect end to a perfect evening!
- Consider taking dance lessons for your First Dance. Your bride and your guests will love it.
